

# ACOUSTIC SCULPTURE

## AN EXPLORATION OF ORGANIC ACOUSTICS

Our fundamental aspiration as a brand is to explore how tech objects can become truly timeless and may transform the wear-and-tear consumer culture.

We design loudspeakers that are as much an interior decoration object, and recently we have up-cycled components and materials into a craft speaker collection we called UPCRAFTED.

We were curious of the sculptural, more organic geometry both because of its even further artistic expression and the acoustic properties of organic shapes.

The inspiration of the Acoustic Sculpture was the human ear and acoustic horn shapes from nature such as a sea shell. In fact, the horn shape in our sculpture naturally amplifies the sound from the speaker elements.

Sculptor: Per Brickstad  
Spray concrete finish: Jörgen Lindqvist, Värmdö Mur  
3D artist: Pernilla Vestman

Material: Concrete, plaster, corn starch resin  
Dimensions: 440x290x240 mm  
Weight: 8 kg (TBD)  
Acoustic volume: 7 l  
Price: 3000 € (TBD)  
Available in limited edition: 2020 (TBD)
