**growing table is good at growing – just like your child.**

Thanks to the uncomplicated screw system, the legs of tables, stools and benches can be adjusted to four different heights. Suitable for children aged one and over. A particularly practical element is the tools: the mobile brackets for pens, paper dispensers and books can be slotted easily into the holes at the edge of the table. Thus growing table becomes the perfect place to work and play.

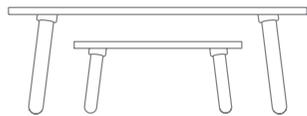

The bench offers space for two – particularly useful when friends come to visit or a little brother wants to join in. growing table can be dismantled entirely and takes up minimum space when stored in its original packaging in case another new arrival appears on the scene. growing table is certified by the German TÜV technical inspection association, proving it also offers optimum safety.

Your children's needs change as they get older. Do they need more storage space for books? Adapt the tools to your children's individual preferences. Be it a box of pens or a bookshelf, each individual part is available separately.

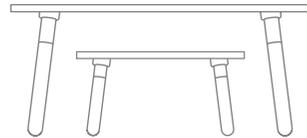

What does rustic farmhouse furniture have to do with growing table? growing table is just as robust and long-lasting, and its design language is just as simple. The details, however, are new and contemporary. Thick, slightly diagonally-slanted legs hold up the strong, 25-mm surfaces of tables, stools and benches. This makes growing table unbelievably stable and gives it its typical, appealing look.

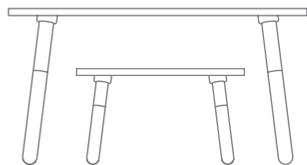

Three parts, four levels: This is the basis for the simple and flexible height adjustment of the legs of growing table. For the smallest users, a height-one growing table uses one of the three leg elements. To move up to height two and so on, one element is added each time, up to the maximum height four, a working height of 72 cm.

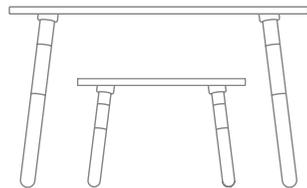

**height 1**  
**age 2-3 Jahre**  
 table 42 cm  
 stool / bench 24,5 cm

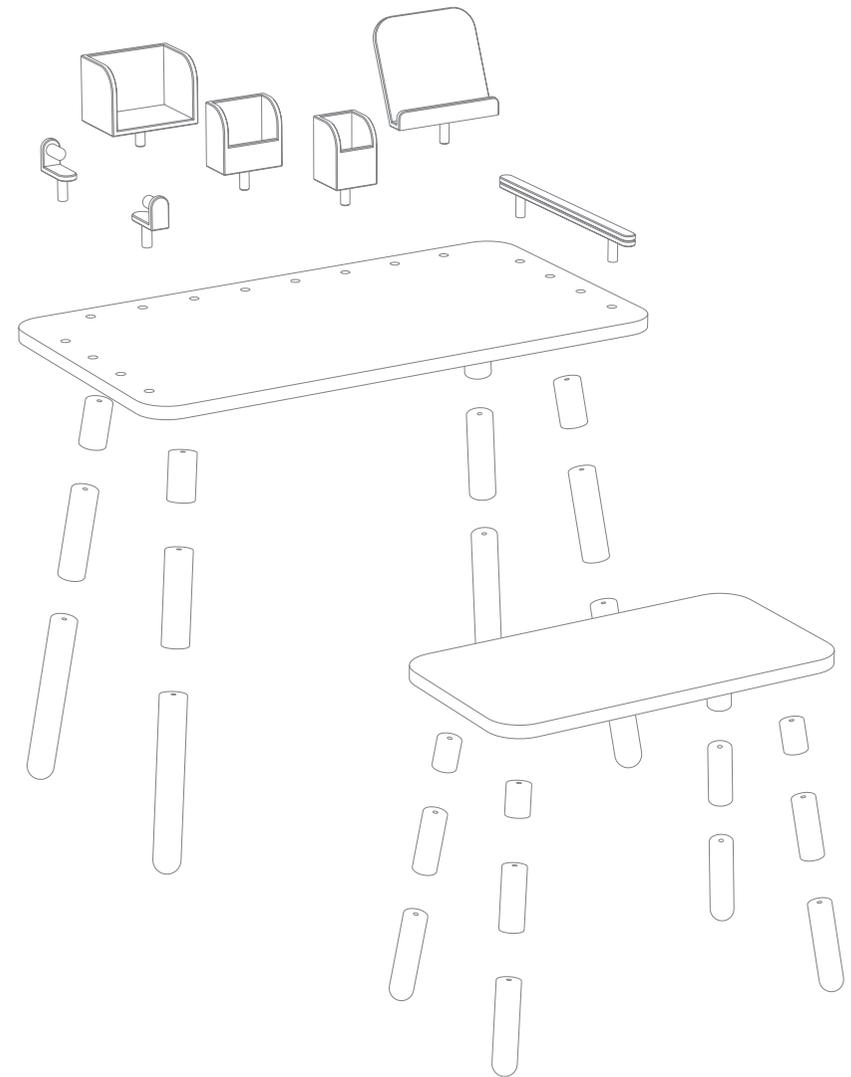

**height 2**  
**age 4-6 Jahre**  
 table 52 cm  
 stool / bench 31,5 cm

**height 3**  
**age 7-9 Jahre**  
 table 62 cm  
 stool / bench 37,5 cm

**height 2**  
**age from 10 Jahre**  
 table 72 cm  
 stool / bench 44 cm

With the growing table tools, your children maintain a clear overview. The handy boxes contain pens and sheets of paper, whilst books can be stored on the shelf below or placed on the book stands when being read. Here your child decides for him or herself just how the elements should be arranged within the series of holes. Ample free space for creativity is provided by the paper dispenser, which stretches across the full width of the table. So there's never a dull moment in play and work at growing table.

The table and bench surfaces are manufactured from a solid, 24-mm, strong birch multiplex panel and are given an abrasion-proof white coating. The legs consist of homely, natural-colored solid beech. growing table is produced in the IWL workshops for people with disabilities. You can purchase growing table on its own or as a complete set.

Birch multiplex,  
HPL white coated

Details of tools:  
Birch multiplex, HPL coated in  
white, red, yellow, green, blue

Details of legs:  
natural, untreated beech

## Dimensions

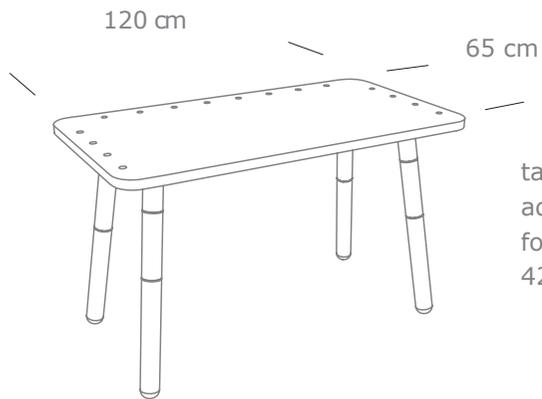

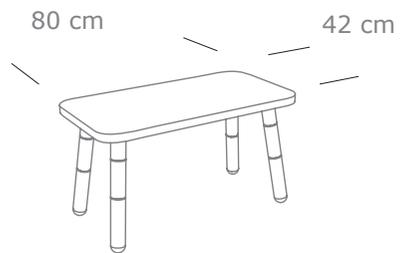

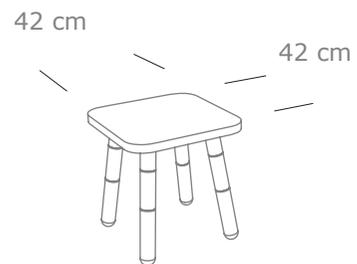

table 120 x 65 cm  
adjustable legs  
for the heights  
42 / 52 / 62 / 72 cm

bench 80 x 42 cm  
adjustable legs  
for the heights  
24,5 / 31,5 / 37,5 / 44 cm

stool 42 x 42 cm  
adjustable legs  
for the heights  
24,5 / 31,5 / 37,5 / 44 cm

growing table is also available in a purely natural version.

„growing table nature“ is made from beech multiplex panels that are treated by hand with natural oil after being processed. As in the original, the legs are manufactured from solid beech.

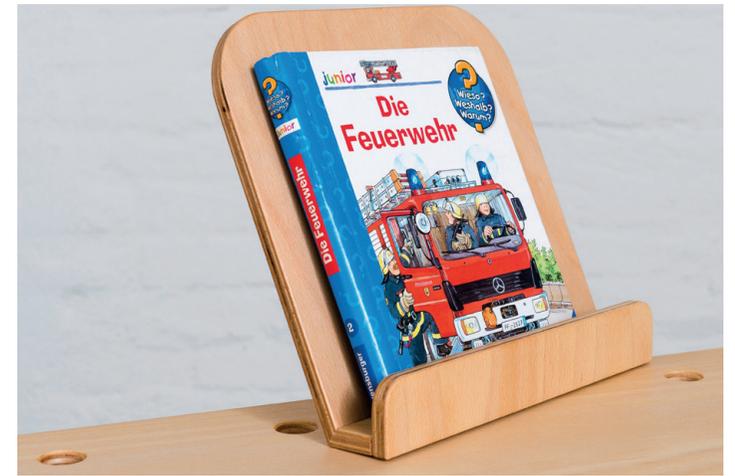

An interesting color alternative to the original growing table made of birch multiplex panels coated white.

Beech multiplex, oiled

Details of tools:  
Beech multiplex, oiled

Details of legs:  
Beech massive wood, oiled

In its square format too, growing table has five holes for tools in the center of the table. This piece of children's furniture, which grows alongside them in the same way as the original growing table, is primarily designed for communicative gatherings in a circle around the table. It's therefore a play or group table. Here, the stools that grow just like the table are particularly suitable as seating.

## Dimensions

table 120 x 65 cm  
adjustable legs  
for the heights  
42 / 52 / 62 / 72 cm

stool 42 x 42 cm  
adjustable legs  
for the heights  
24,5 / 31,5 / 37,5 / 44 cm

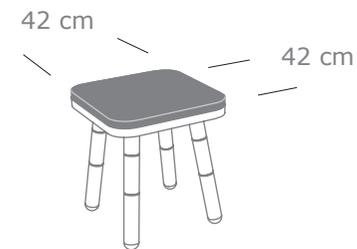

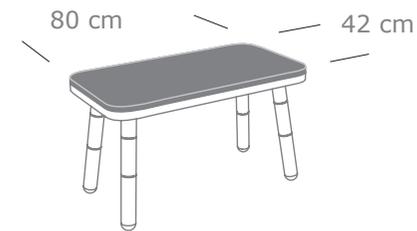

A cushion made of 1cm-thick virgin-wool felt in mottled grey offers additional seat comfort for both the bench and the stool.

The latex-covered underside of the felt prevents the seat from slipping.

Manufactured in Germany.  
100% virgin wool
