STEP 1

Ensure power supply is turned off and remove any existing lamp fitting. Locate the supply cable and ensure it is ready to be fitted to the connector block.

Mount the metal bracket securely in the ceiling with screws and wall plugs, appropriate for the ceiling of installation.

STEP 2

To determine the right suspension height for the lamp, pass the electrical cord through the strain relief of the metal bracket. When you have the desired suspension height of the lamp, tighten the plastic screw of the strain relief.

STEP 3

Connecting the wires:

Cut off the excess cord using a cable cutter so that minimum of 80 mm cord is left to reconnect to the cable connector. Peel back the outer cable using a cable stripper to expose 30 mm of the blue and brown inner cables. Strip the inner cable to expose 5 mm of wire. Connect the blue supply wire to the blue fixture wire. Connect the brown supply wire to the brown fixture wire. Connect the green supply wire to the green fixture wire.

STEP 4

Install the plastic canopy onto the metal bracket.

STEP 5

Install the E27 bulb.

220-240V - 50 Hz

CE □ F IP20
