

SOFT EDGE

By Iskos - Berlin

HAY

Iskos-Berlin's Soft Edge chair and stool series was originally created by exploring innovative developments in moulded plywood techniques. The Copenhagen-based design duo collaborated with HAY to push the boundaries of industrial moulding, combining strong curves with extreme lightness to create a three-dimensionality that is not normally possible with 2D plywood. All the edges of the ultra-thin, soft-formed seats are bent away from the body, designed to optimise human-centric comfort for constant shifting and movement.

The series has since been extended to include chairs and stools with frames in wood or steel with different finishes, while the seat is available in 2D plywood, upholstery or plastic in different colours. All the designs are strong, stackable and functional.
